

VPN INSTALLATION GUIDE: MAC OS

VIPERSURF™ LLC

MACOS INSTALLATION

DOWNLOAD THE APP

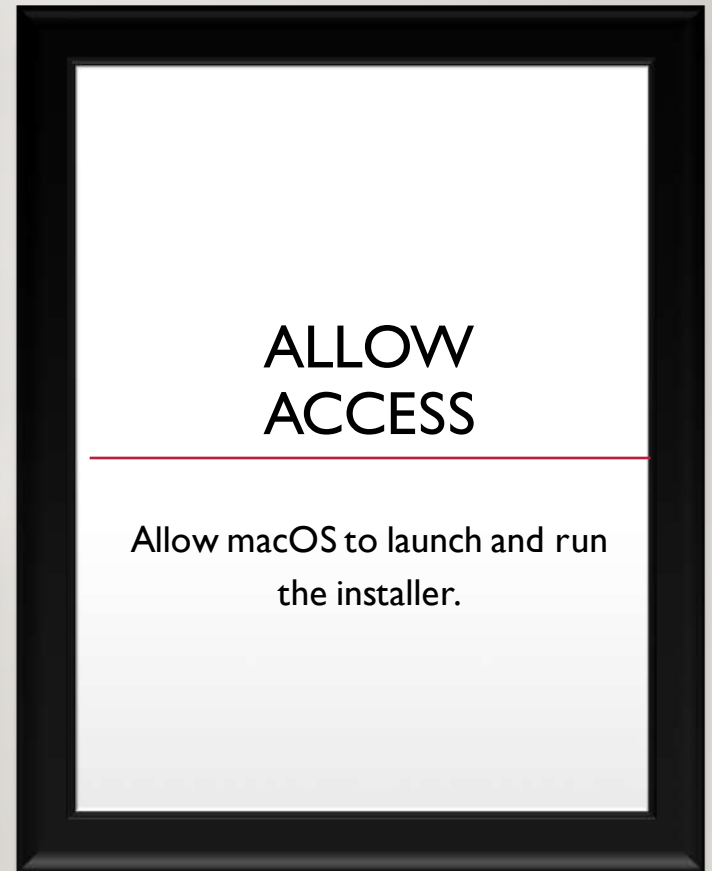

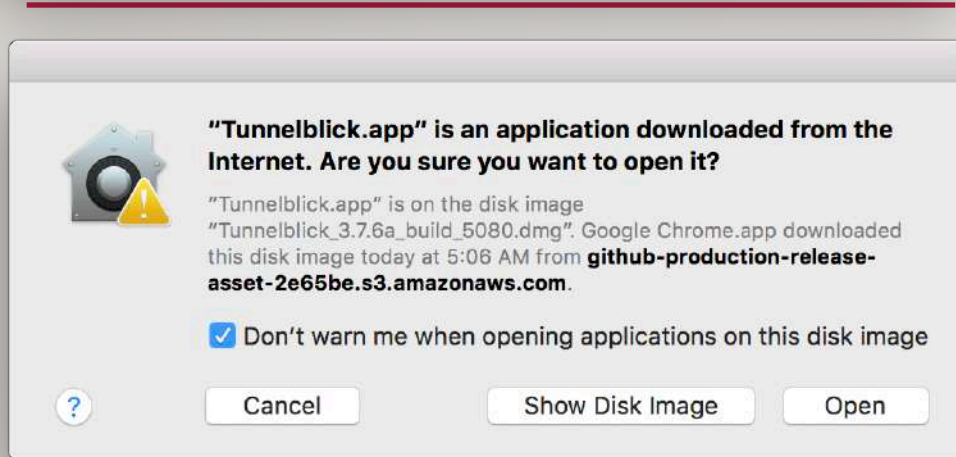

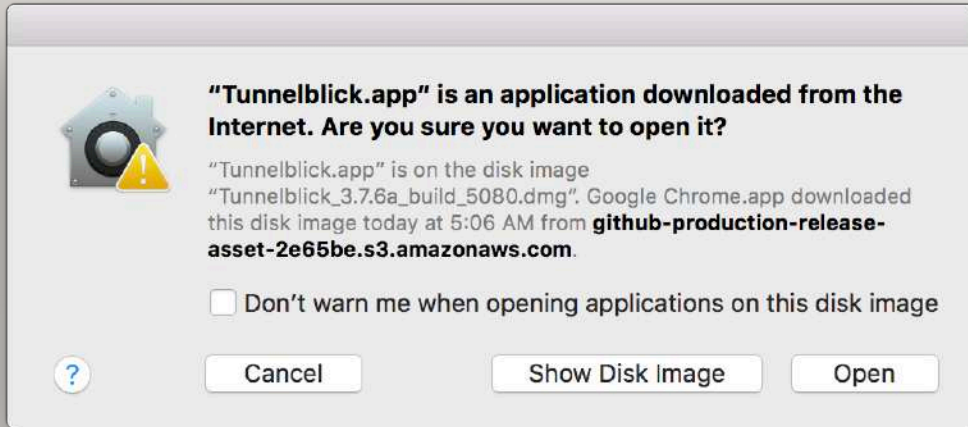

Find the 'Tunnelblick' application
by navigating to

<https://tunnelblick.net/downloads.html> and downloading the stable
build.

INSTALL

Launch the .dmg file that you downloaded and double-click the 'Tunnelblick.app' file to install.

Welcome to Tunnelblick

There are no VPN configurations installed.

Tunnelblick needs one or more installed configurations to connect to a VPN. Configurations are installed from files that are usually supplied to you by your network manager or VPN service provider. The files must be installed to be used.

Configuration files have extensions of .tblk, .ovpn, or .conf.

(There may be other files associated with the configuration that have other extensions; ignore them for now.)

Do you have any configuration files?

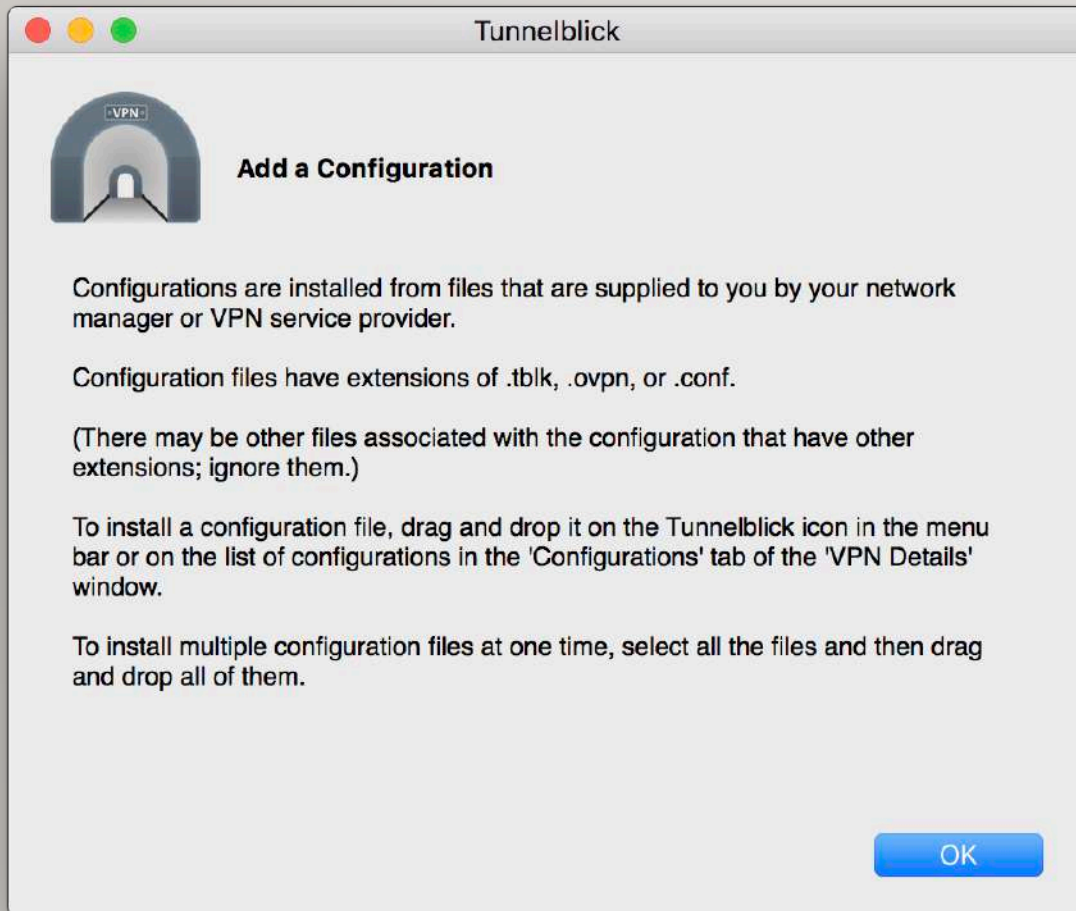

Quit

I DO NOT have configuration files

I have configuration files

USE YOUR FILE

Tell 'Tunnelblick' you will use your own .ovpn file by selecting the option 'I have configuration files'.

CONFIRM THE TOOL TIP

Read through Tunnelblick's tool tip and click 'OK', after which, drag and drop the .ovpn file to the icon in the system tray in the top to import the configuration.

No Active Connections

VPN Details...

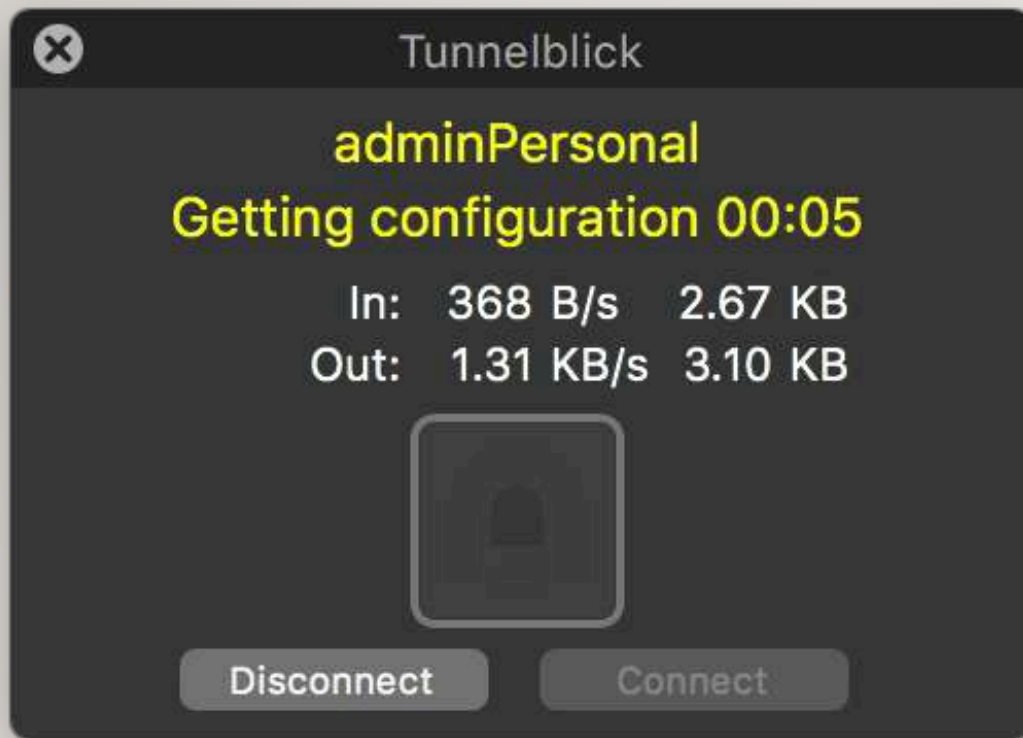

Connect adminPersonal

Connect betavpn_vipersurf_com_admin

Quit Tunnelblick

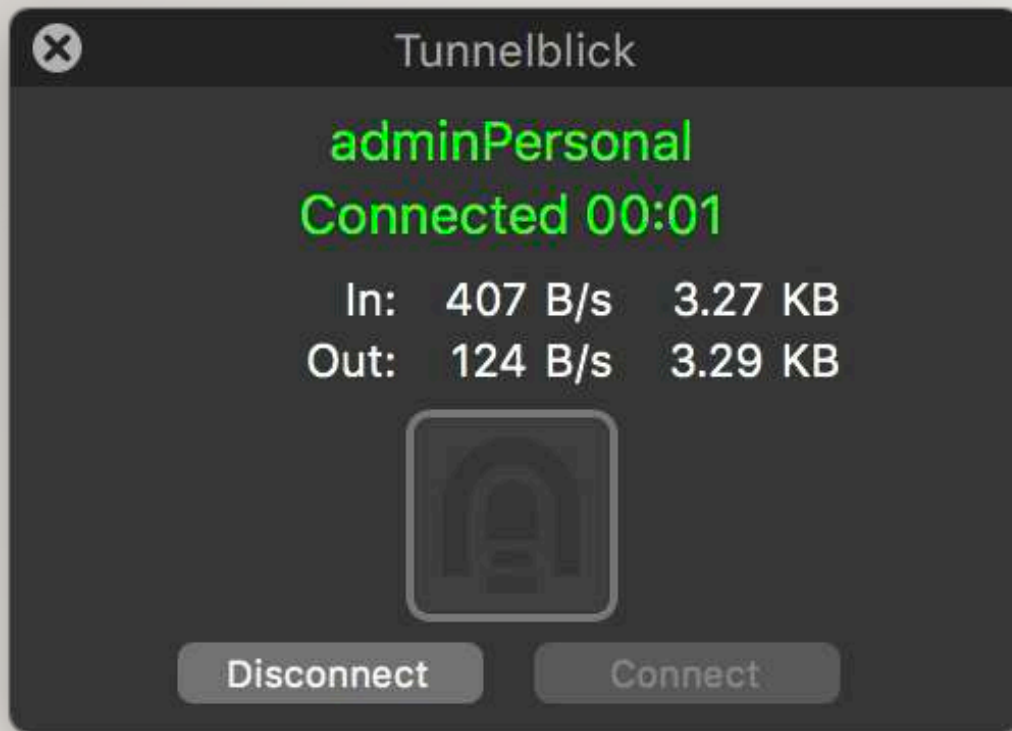

VIEWVPN LIST

After importing the file, you should see a list of imported configuration files. Select the VPN you want to connect to.

CONNECTION PROGRESS

You should see the following image showing the status of the VPN connection.

CONNECTION PROGRESS

You should see something similar to the image on the left when you are connected. This will indicate that you are connected to the VPN.

**ENJOY SAFE, PRIVATE,
AND SECURE INTERNET!**
