

VPN INSTALLATION GUIDE: MOBILE

VIPERSURF™ LLC

MOBILE INSTALLATION

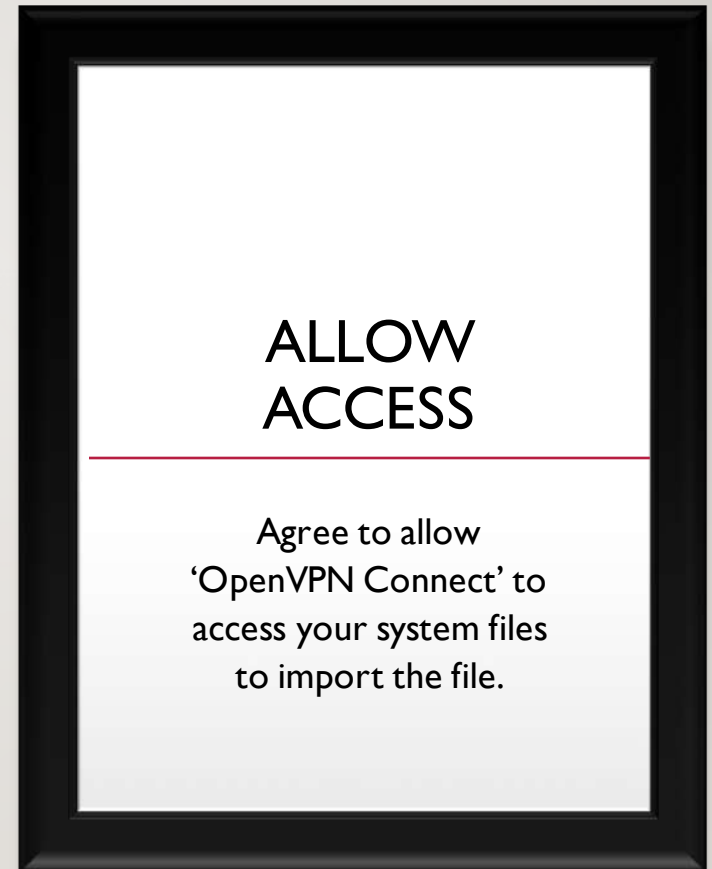

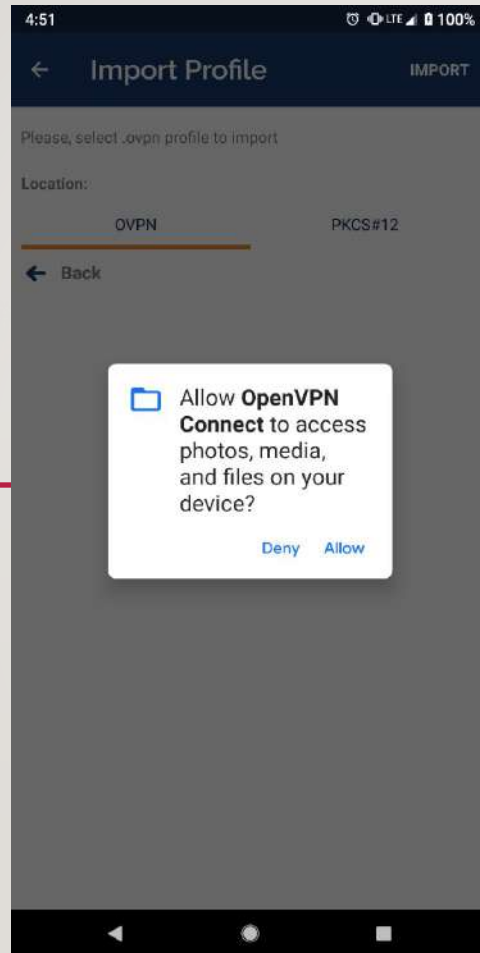

DOWNLOAD THE APP

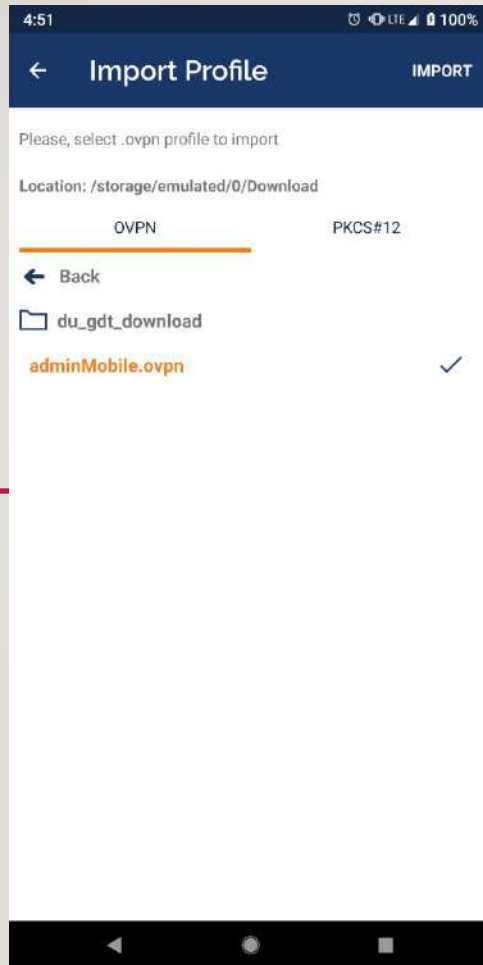

Find the 'OpenVPN' app in the App Store or Play Store and click 'Install'. Open upon installation.

LAUNCH

After launching the app, you will be presented with the following screen. Select the option 'OVPN Profile'.

IMPORT

After downloading the .ovpn file that was sent to you, select it from your 'Downloads' folder. You should see a checkmark next to the imported .ovpn file after selecting it to import.

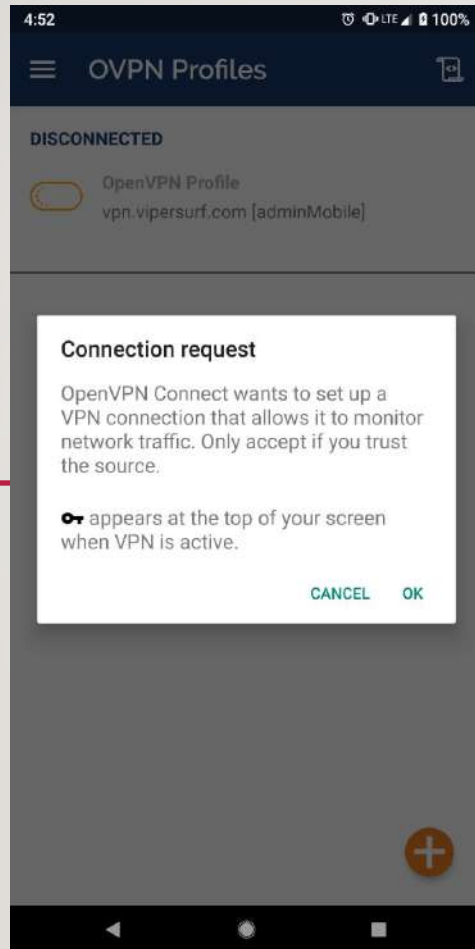

RENAME (OPTIONAL)

Rename the file in case you have multiple VPN's for easy recognition.

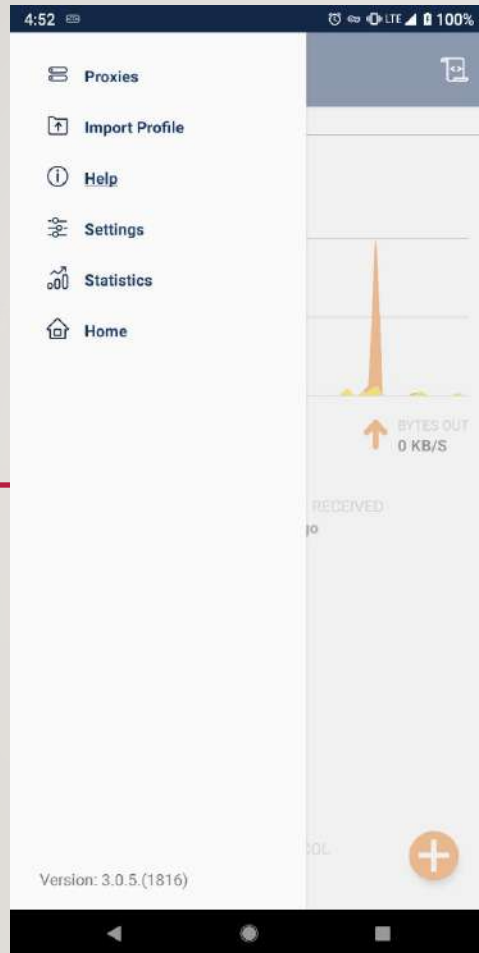

VIEWVPN LIST

After importing the file, you should see a list of imported configuration files. Click the switch button on the left to start the connection.

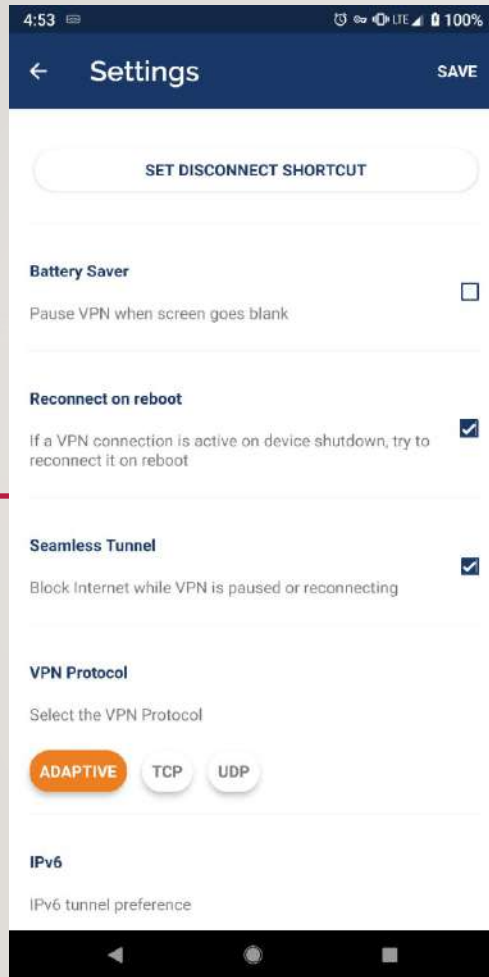

ACCEPT REQUEST

Accept the request for OpenVPN to initiate the VPN connection. A key icon should appear in the notification bar to indicate that you are connected.

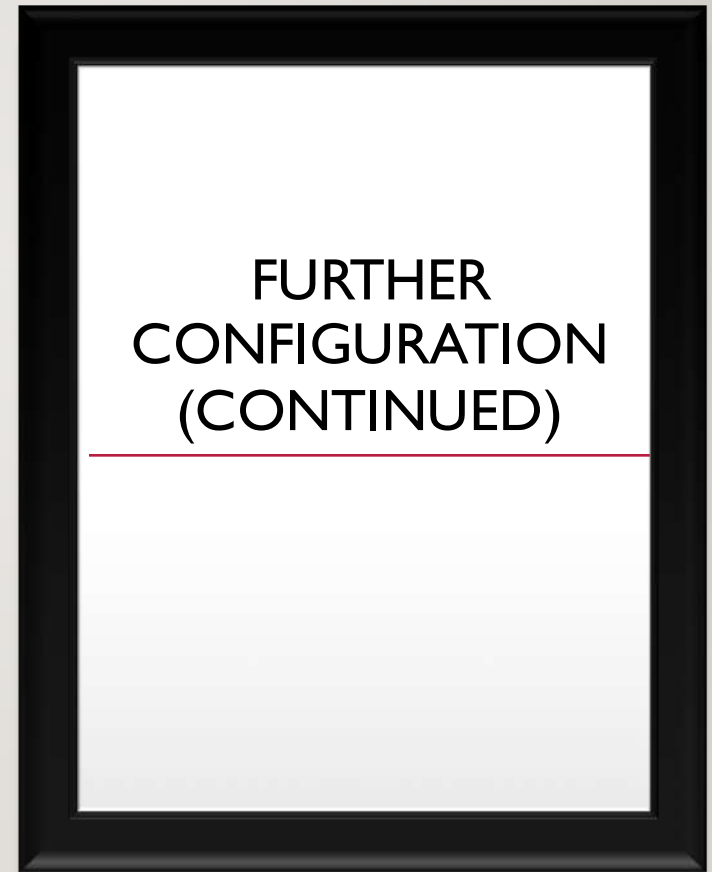

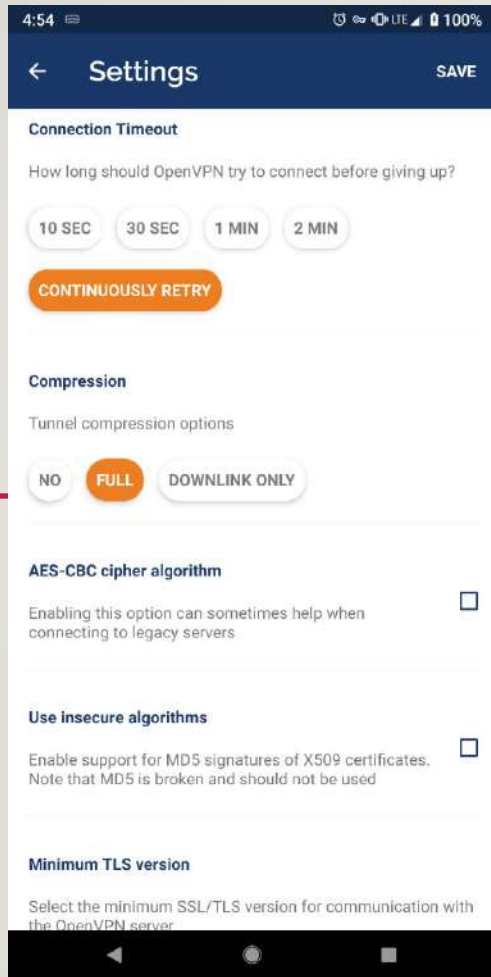

FURTHER CONFIGURATION (OPTIONAL)

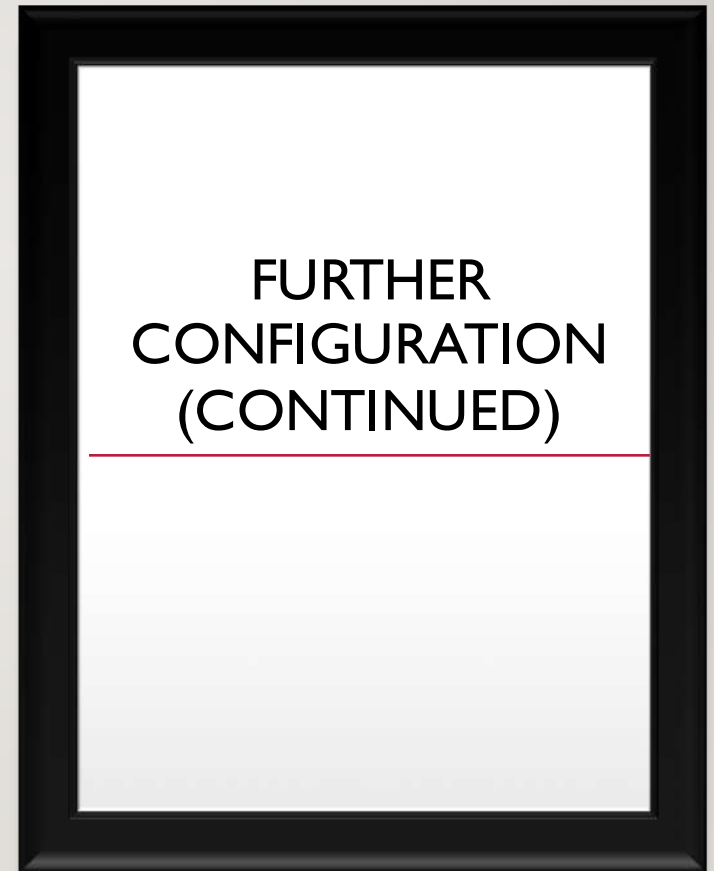

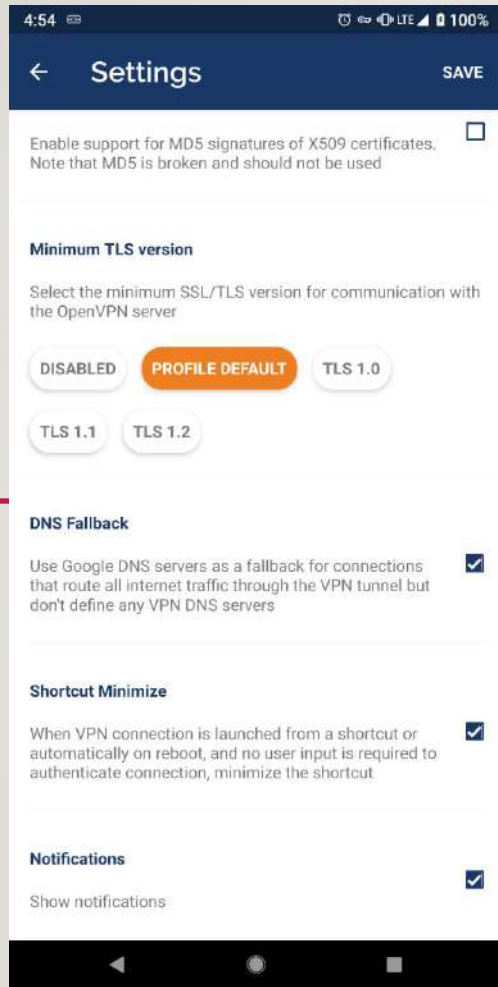

To ensure constant connection and other settings, click the hamburger menu in the top left and navigate to the settings screen.

FURTHER CONFIGURATION (CONTINUED)

Match the settings in the images to ensure constant connection and improved security.

**ENJOY SAFE, PRIVATE,
AND SECURE INTERNET!**
